CAREER OBJECTIVE

To attain a promotive platform to contribute in a professional work driven environment where I can utilize and apply my knowledge, skills which would enable me as an engineer to grow by doing the best in the field that I step in.

ACADEMIC CREDENTIALS

Description	Discipline	Education	Year of Passing	CGPA
B. Tech.	Computer Science & Engineering (DS)	Vaagdevi Engineering College Warangal	2025	7.1/10
Intermediate	M. P .C	Shivani Junior College	2021	934/1000
S.S.C	--	TS Model School	2019	9.5/10

PROJECT EXPERIENCE

- **Estimating Presence or Absence of Smoking In Human Body Through Bio-Signals**
 - Detected whether a person is a **smoker or non-smoker** based on changes in their bio-signals such as heart rate, respiration rate, and skin response.
 - Analyzing physiological parttens like heart rate, respiration, and skin response to detect smoking.
 - Used ML models (e.g., **Random Forest Classifier, SVM**) to classify bio signals indicating smoking presence/absence.
 - Applied AI for healthcare to enable early detection and **smoking cessation** support.
- **Sign Language Recognition Using Python and OpenCV**
 - Developed a Sign Language Recognition System using Deep Learning and Computer Vision to facilitate communication for the deaf and mute community.

- using **Python, OpenCV, Keras, and TensorFlow**, leveraging **Convolutional Implemented Neural Networks (CNNs)** for gesture recognition.
- Designed and trained a **CNN model** to detect and classify **hand gestures (1-10)** in realtime using a **custom dataset**.
- Showcased the integration of **AI in assistive technology**, promoting **social impact and accessibility**.
- **Early Stage Disease Diagnosis System Using Human Nail Image Processing**
 - Developed a **CNN-based system** for early-stage disease diagnosis using human nail images and deep learning.
 - Achieved high accuracy in detecting diseases like **anemia, diabetes, or nutritional deficiencies** through nail processing.
 - Optimized model for mobile deployment using **TensorFlow Lite** for accessible healthcare screening.
 - Enabled non-invasive diagnosis leveraging AI for early intervention and healthcare support.
 - Implemented using **Python, Flask, HTML, CSS, CNN (Deep Learning)**.
- **AI Resume Screening System**
 - Developed an AI-driven resume screening system using **NLP and ML** to automate candidate shortlisting.
 - Implemented text analysis with techniques like **TF-IDF** and **word embeddings** to extract key skills and experience.
 - Achieved high accuracy in matching job descriptions with candidate profiles, reducing screening time by **~70%**.
 - Deployed scalable solution with **Flask, python** for HR dashboard integration.

SKILL SET

- **Programming Languages:** Python
- **Frameworks & Libraries:** Tensorflow, Keras, Django, Pandas, Numpy, Matplotlib
- **Databases:** MySQL
- **Tools:** Google Colab, Sublime, Jupyter Notebooks, VsCode, Github
- **UI Development:** HTML, CSS, Java script, Bootstrap
- **Operating Systems:** Windows, Linux

PARTICIPATION & CERTIFICATIONS

- Certificate completion of **Microsoft AI skills** challenge | January-2024
- Certification completion of **Gen-AI Workshop From Basics To Deployment** Conducted by **Innomatics Research Labs** | November-2025

EXPERIENCE & INTERNSHIP

- **AICTE-Edunet** Virtual Internship on Data Analytic using AI-LLMs | October 2024-November 2024
- Certification of Achievement for completing IR4.0 foundation course under **TechSaksham** program by **Microsoft, SAP** and **Edunet Foundation**.
