## CAREER OBJECTIVE

To attain a promotive platform to contribute in a professional work driven environment where I can utilize and apply my knowledge, skills which would enable me as an engineer to grow by doing the best in the field that I step in.

## ACADEMIC CREDENTIALS

| Description  | Discipline                         | Education                              | Year of Passing | CGPA     |
|--------------|------------------------------------|----------------------------------------|-----------------|----------|
| B. Tech.     | Computer Science & Engineering(DS) | Vaagdevi Engineering College- Warangal | 2025            | 7.1/10   |
| Intermediate | M. P .C                            | Shivani Junior College                 | 2021            | 934/1000 |
| S.S.C        | --                                 | TS Model School                        | 2019            | 9.5/10   |

## PROJECT EXPERIENCE

- **Estimating Presence or Absence of Smoking In Human Body Through Bio-Signals**
  - Detected whether a person is a **smoker or non-smoker** based on changes in their bio-signals such as heart rate, respiration rate, and skin response.
  - Analyzing physiological parttens like heart rate, respiration, and skin response to detect smoking Used ML models (e.g., **Random Forest Classifier, SVM**) to classify bio signals indicating smoking presence/absence.
  - Applied AI for healthcare to enable early detection and **smoking cessation**.
- **Sign Language Recognition Using Python and OpenCV**
  - Developed a Sign Language Recognition System using Deep Learning and Computer Vision to facilitate communication for the deaf and mute community.
  - Implemented using **Python, OpenCV, Keras, and TensorFlow**, leveraging **Convolutional Neural Networks (CNNs)** for gesture recognition.
  - Designed and trained a **CNN model** to detect and classify **hand gestures (1-10)** in real time using a **custom dataset**.
  - Showcased the integration of **AI in assistive technology**, promoting **social impact and accessibility**.

- **Early Stage Disease Diagnosis System Using Human Nail Image Processing**

- Developed a **CNN-based system** for early-stage disease diagnosis using human nail images and deep learning.
- Achieved high accuracy in detecting diseases like **anemia, diabetes, or nutritional** deficiencies through nail processing.
- Optimized model for mobile deployment using **TensorFlow Lite** for accessible healthcare screening.
- Enabled non-invasive diagnosis leveraging AI for early intervention and healthcare support.
- Implemented using **Python, Flask, HTML, CSS, CNN (Deep Learning)**

- **AI Resume Screening System**

- Developed an AI-driven resume screening system using **NLP and ML** to automate candidate shortlisting.
- Implemented text analysis with techniques like **TF-IDF** and **word embeddings** to extract key skills and experience.
- Achieved high accuracy in matching job descriptions with candidate profiles, reducing screening time by ~70%.
- Deployed scalable solution with **Flask, python** for HR dashboard integration.

- **Employee Management REST API (Flask)**

- Built a Flask REST API with JWT authentication for employee management.
- Implemented **CRUD operations** and tested using Postman
- Technologies used **Python, Flask, Flask-SQLAlchemy, Flask-JWT-Extended, SQLite, Git, GitHub, Postman.**
- Configured application using a centralized **configuration file** for security and database settings.
- Tested API endpoints using **Postman**, including authorization with Bearer tokens.
- Version-controlled using **Git** and hosted on **GitHub**.

## SKILL SET

- **Programming Languages:** Python
- **Frameworks & Libraries:** Tensorflow, Keras, Django, Pandas, Numpy, Matplotlib ,Flask.
- **Databases:** MySQL
- **Tools:** Google Colab, Sublime, Jupyter Notebooks, Vs Code, Git and Github
- **UI Development:** HTML, CSS, Bootstrap
- **Operating Systems:** Windows, Linux

## PARTICIPATION & CERTIFICATIONS

- Certificate completion of **Microsoft AI skills** challenge | January-2024
- Certification completion of **Gen-AI Workshop From Basics To Deployment** Conducted by Innomatics Research Labs | November-2025

## EXPERIENCE & INTERNSHIP

- **AICTE-Edunet** Virtual Internship on Data Analytic using AI-LLMs | October 2024-November 2024(
- Certification of Achievement for completing IR4.0 foundation course under **TechSaksham** program by **Microsoft, SAP** and **Edunet foundation**
